C-TRAN

Proposed by C-TRAN staff earlier in the year, and approved by the C-TRAN Board of Directors on October 13, 2009, the route changes inside this guide were the subject of several open houses and a public hearing. Based upon public feedback, modifications were made to the original proposal and are reflected inside this brochure.

While these changes were necessitated by the recent economic downturn, C-TRAN will continue its efforts to improve service and address safety concerns through its Service Enhancement Program. Aimed at reducing costs by providing more efficient and streamlined service, the program provides improved schedules that reflect passenger needs and demand. This philosophy helps ensure that today's service is ready for tomorrow.
