

**Doo something
Pensive**
for our streams!

1. **Scoop** the poop
2. **Bag** it
3. Put it in
the **garbage!**

Who scoops?

The dogs of Clark County produce more than 6,000 TONS of poop per year!

When it rains, this raw sewage washes into the nearest stream, where it pollutes our water with harmful organisms and destroys aquatic habitat.

Luckily, doing your part is as easy as 1-2-3!

1. Scoop the poop
2. Bag it
3. Put it in the garbage!

Show your commitment by taking the Canines for Clean Water pledge at www.cleanwaterdogs.com, and we'll send you a FREE bandanna for your pooch!
